THURSDAY

AUGUST II 1934

"Expand or Die"

Viscount Toki Japanese diplomat visit ing this country apparently belongs to the frankness in spee h school of thought Asked about the ultimate aims of his country in China he repiled. There are three nations which must expand or their people will pertuh. They are Germany Italy and Japan Larger lands housing vanily smaller populations must absorb our surplus peoples. We do not wish to do

this through aggression but-Tragically enough there a pinch of truth in what the viscount says. The three countries mentioned are handicapped by inadequate raw material resources and reputedly are building for the day when hey can acquire additional fertile col onles. They are the three nations most likely to plunge the world into war

Viscount Tokia slatement was given in formally but it hinted alarmingly at the unanimity of opinion and perhaps inten tion among the three powers. Their demands for new resources are going to grow more insistent. Will they be recognized and discussed in open conference? Or will they remain unheaded until the three nations feel they are strong snough to proceed beyond that but in the viscounts admission? World peace may hinge upon the answers to these questions so frankly highlighted by a frank diplomat

Upsets.

The newer question on the Olympic front following that of the supremacy of this scentry's Negro short distance runners to why Japanese are such amazingly good

Once more the experie are at work with comparative measurements to find a clue This those they aren't having much luck There is nothing like the tendency of Negro renners to have short heals to lead them on to a sonstusion Japanese apparently have no tell tale characteristic

Other questions which have begged for answers are the supremacy of Finns in long distance running and the long walt of Germans to compele on an equal basis with other Olympic athletes Inability to snawer these questions satisfactorily may be the

In the 1986 Olympic games German athletes are having fair success. Moreover the marathon this year was won not by a Finn nor by the former champion an Ar but by a Japanese college stu dent Furthermore United States swim mers are threatening the supremacy of their Nipponess brothers

If the experts can welt-of they will be patient they may see the day when Finns will be the best enimmers Americans will he the best distance runners Frenchman will be the best polo players. Negroes will he weight lifters instead of aprinters and Herr Hitlers Arvan white hopes will be hetter than all the others together. If in the meantime positive reasons can be found why the current orders of excellence should remain so permanently all well and good but the reasons probably will be upset eventually

Accident or Design

President Rousevelt will pay a visit to Cleveland on the day the Rev Father Coughlin piherwise would have held the spotlight in that city sions at the opening of the National Union for Social Justic corvention Later in the month the President will

make a tour of the drouth region while his opponent is delivering a series of speeches in the east Last June Mr Roosevelt chose the week of the Republican national convenion to take a trip through the south

All these plans have been construed as evidence that President Roosevell is not averse to making the most of his oppor tunity as thic; executive of the United Sta es to make political hay while the sun shines Bluntin he is not above stealing the spodight from his opponents

His critics seem to think that as long as drouth relief and partisan pointics are inseparable in an election year Mr Roose welt should not seek to dramatize his in terest in the former because I might be helpful to him as a candidate for reelection

They seem to think that Mr Roosevelt should not take advantage of any oppor funity to outshine an opponent or a critic when merely by remaining in one place he could forego the attention a President always attracts when he travels about the country

The same more has armen in every presidential campaign. The fact is there is no reason why anyone should expect a politician who is awake to the highly competitive business of getting elected to pass up a sirgle opportunity to get votes for

simpelf or to take them away from the opposition in the case of Frenchin D Renesely who has made a successful political nateer by being a seer opportur a criticiam on that a ure betrays either tha he underestimates the mar or noids a childish notion that the President around crarge his ways to give ris app ner a a

Holt Bolts?

For a ong time t has been grown trat Democratic Pust D Holt joung senato from West Virginia has reen unnapp and in of position to ris farty leaders. With the possibility of a brill ant political future be fore him the 31 , ear o'd serator chose o become a bitter critic of the administra tion a relief policy in nin II at year of office holding Consequently he asserts he has found himself out in the cold when patron age powers were being dispensed. Although repealedly he has bashed no

head against the unyielding wall of party loyelly meny thought this senatorial baby eventually might bow to the inevitable and start observing the big league rules in ex pectation of sharing in the world series malon. It is all the more surprising there fore to hear that Ptush Holt is going to be the keynoter at the convention National Union for Social Justice which opens in Cleveland this Friday

One does not have to be anti-Coughila to believe the West Virginian is straying far from Democratic pastures by consenting to fire the opening gun at the NUSJ meet ing The recognized fact that Rep Lemise Union party if backed by the radio priest a group will rob the Damocrate of mant important votes is sufficient to place the label of deserter on the keynoter Since party chieftains have a way of

dealing with disloyalty the riddle of Holtiso molives becomes more puzzling. At first it was thought the newcomer to politics might he sneking publicity by his attacks on WPA but he had shattered the plausibility of that theory before congress adjourned. He appeared to be a distillusioned young man one who had expected to find the gold altersiam in national life and had found the draws of selfishness. If he carries his dis illusionment to the point of ruining a promising earner he will indeed be a rare phenomenon in American politica

Definition Needed.

Announcement that the Daughters of the American Revolution will campaign for strink enforcement of teachers oath laws starting with the fail school term brings up an old but always interesting question What is and what is not American?

Mrs William A Backer president general of the order declares the D A R does not believe our public schools are packed with communistic teachers but it does insust. however upon weeding out the un American teacher engaged in planting subvarsive decirins, in the minds of future citizens

Without quibbling it might be agreed that communism is not American. That is our founding fathers did not envision such a form of government and the great mass of citizens today consider it alien to our soil Yet there is no guarantee that the day will not come when a majority of Americans will walcome communism and perhaps even hall it as a native product. At one time the income tax law was denounced vehementiy as unAmerican

On the other hand there is no certainty our present form of government is en demically American. Although wanting to break from European ties our founding fathers were soaked in old world traditions and culture. Even freedom of speach is not proullarly American

other words ideas and institutions are not exclusively American rather tha American scane has given new vitality and significance to many old ideas and in

Start Figuring

Official department of agriculture esti-mates for crops as of Aug 1 confirm rumora of acute shortages. Unexpectedly the nation has bumped into a new kind of farm prob lem-scarcily It s time for the farm on perts to start figuring

It will be some time before consumers wake up to the miluation In all probability they will not be able to know for at least enother month how serious the shortage is going to be Maybe by that time the experts will have a solution

Rainfall in key sections of the country still could make an important difference The department of agriculture's estimates were based on conditions as of Aug 1 not possibilities. Later they may be revised favorably it is unlikely however they will becoma lees favorable

They do not need to be worse to cause genuine alarm. Already they indicate the nallest corn crop since 1881 the emailest wheat crop since 1917 with shortages in other crops going back to the nineteenth century for points of comparison

Here is a problem worth; of the professional helpers of agriculty e-a problem of making it rain of making the sun shine at the right time and of turning off he rain when there has been enough Fortunately even though they had some success with creating an artificial short age by the judicious use of government checks they probably wond have nerve enough to tackle the mysteries of precipita tion and sunlight

Party Organization All Important

Republicans Must Bring Out the In different Voter and Those Inclined To Oppose New Deal

By DAVID LAWRENCE gar 1834 by The Marion Star

(HICACO And 12 - There may be much find for conversation in the various political and straw ofth that are being made now adays but the last and most important pell of any large number of voters that H upon careful atudy reveal some a g nificant trends is the primary vote in eleven Here at Republican national needquarters

Here at Republican national meadquarters the, can hard) get much comfort out of a reaxamination of primary voting but so far as indicating the job the Pepublicans have ahrad of them if they are to win the tabulation shows clearly where the organi-zation work of an intensive character must

There assume no doubt that the heavy Democratic vote in the primaries in some states dis lores the effect of the WPA and other relief organizations. This shows up especially in noting the abnormal increases in the Democratic vote in attess where there are populous cities and towns it indicates a corresponding failure to increase proportionstely the Democratic vote in states that are more aparesty populated where it is difficult for the relief vote to be corresponding to the Democratic vote in states that are more aparesty populated where it is difficult for the relief vote to be corrected to easily as in the cities and large towns. Here is a table showing the percentage of the total vote obtained in the recent primaries in selven states. It has compiled it so far as possible from official returns or from the latest published unofficial returns.

filinoia California Nebraska W Va Wisconsin Missouri

It will be noted that in every one of these states the Democratic percentage of the total vote is the larger

Now the states in which the Republicana exceeded the Democratic percentages in the primaries are these

Oregon Ohio Youth Dakola Kansas

It is not surprising to find the foregoing five blates in the Republican column as they have voted more often that way then Democratic But it is surprising to find Hillinois California Nebraska and West Vir ginia as well as Wisconsin showing such a heavy Democratic total The fact that President Roosevelt's name appeared on the buildt in some of these states as in Illinois for example and that he got 520 000 more votes than both Mr Knox and Mr Borah is interesting but even more so is the fact that 516 000 of the Roosevell majority over the Republican presidential nominees was obtained in Cook county which includes Chicago and environs. Here is where the vote can easily be concentrated

relief vote can easily be concentrated. In the downstate counties Mr. Roosevelt had 640851 and the combined Republican vote was 630349. There are of course a number of little cities in what is called downstate Illinois so that the opportunities for organizing the relief vote are on a small scale what they are in Chicago. In other words the usually solid Republican vote outside of Cook county does not materialize when examining the primary figures.

To beat this showing the Republicans will have to find in downstate Illinois enough rotes to offset the new deals and vantage for obvious). Cook county is not going to give Mr. Roosevell fewer votes than it did in the primary

It all comes to a question of gelling nut the vote There were in 1932 about 12 000 000 persons eligible to vote who did not vote Had they voted they probably would have divided in about the same ratio that the 22 000 000 did who voted for Mr Roosevelt and the 17 000 000 who voted for

Mr Hoover
The objective of the Republicans is to get group is a large enough number this year to swing the election. The get out the o swing the election. The get out the ote drive has commenced. But the Republican command has not yet properly ap-praised the intensive job that has to be done if it is to win the election by getting out all the voters who are inclined to oppose

The new deal is depending in this cam paign on the jobholders and their friends The Republicans are depending on volunteer workers Organization will be the deciding factor in this election
